A venue can be transformed with the simple use of lighting. We always recommend a range of uplighters to wash the walls with colour and with our choice of LED uplighters and simple controllers, clients may change the ambience themselves at the touch of a button.

Battery versions are now available, therefore clients no longer have to worry about cabling and electric consumption – simply place and operate.

Disco lighting effects and lasers are available to help create simple light shows which can be easily switched on or off and will automatically animate to the beat of the music.

If a client is looking for something more sophisticated, we are able to offer programmable moving lights in wash, beam and spot versions, with selectable gobos and colour mixing facilities. Please ask for details.
